

Fiberglass Ramps

Ultra manufactures both pedestrian ramps and light hand truck ramps at almost any angle or width. These ramps are perfect for ease of access to existing or new platforms, catwalks or staircases. Wherever there is an elevation change, these high strength fiberglass ramps can make the transition easy and safe. Handrail on the ramp will enhance safety.

(bottom middle photo) Combination pedestrian stair and hand truck ramp. This unit was fabricated with wide flange beams set on edge to act as runners for hand truck wheels and also to allow workers to use the unit as stairs. Handrail on both sides meets OSHA specification. Ramp/stair unit leads to a raised platform used for mezzanine storage.
