

# Rooftop Antenna Supports

Fiberglass structures can be a good solution for rooftop antenna sites. Fiberglass has virtually no RF signature, is light weight so as not to overload roof structural limits and easily assembled on site. Platforms can help keep workers safe and cables and wiring managed in a contained fashion.

Ultra Fiberglass Systems is a premier, full service fabricator of fiberglass platforms, ladders, handrail, grating and open stock fiberglass structurals. Call Ultra today for further information and design assistance.
